

# Self-washing detergent for batteries and filters 5 L

- cod. HCC100014

## TECHNICAL SPECIFICATIONS:

- Specific cleaning of the batteries and filters of refrigeration and air conditioning systems
- It is non-toxic and contains no acids
- For a cleaning action: dilute in water 1:15
- For a purifying action: dilute in water 1:20

## DESCRIPTION

Product formulated for cleaning batteries and evaporator filters.

Ideal against mold and dust.

After application, this product is rinsed from the condensate water, quickly removing dirt.

It contains no acid, so it is harmless on every material.

## PROPERTIES

- Specific for filter sanitization.
- Removes dirt that water cannot remove.
- Self-washing: no need to rinse.
- Available in concentrated and ready-to-use version.
- Perfumed.
- Does not damage equipment.

## USES

Easy to use, this product offers a deep and fast cleaning of batteries and evaporator filters effectively removing dirt, smog, mold and bad odors and leaving instead an applied scent of lavender.

## USE:

# DATASHEET

Dilute the liquid in water in a concentration of 1:20 for a cleansing and refreshing action or 1:15 for a sanitizing action.

Remove the filter from the internal unit.

In the case of very dirty filters, remove most of the deposit with a simple cloth before using the self-washing machine.

Spray the product directly on the filter to obtain a uniform coverage.

Leave for a few seconds and pass a cloth to remove the residue.

Now spray the product on the batteries of the internal unit and do not rinse: the condensation will take away the dirt and residue of the self-washing.

Refit the filters and the air conditioner is again ready to use, cleaned and sanitized.

## SAFETY INFORMATION

Read and observe the safety warnings on the container's label.

For information regarding handling, transportation, etc., refer to the Safety Data Sheet (SDS) for the product in question.

## DILUTION

Type: concentrated

Dilution: 1:15 / 1:20
