

Condensate drain pipe Ø 18 double cladding - Sleeves Ø 16/18

- cod. 11126344 - cod. SCD300001

DESCRIPTION

The corrugated condensate discharge pipe Ø18 is made in anti-UVA polyethylene with double coating, white on the outside and black on the inside.

Packaged in 50 m rolls or 25 m mini-rolls.

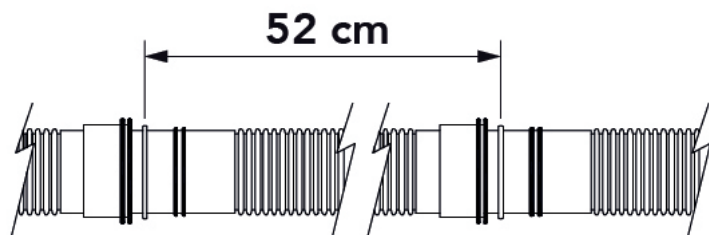

Every 52 cm there are Ø16/18 m/f fitting sleeves; this helps to cut the pipe to length to avoid wasting material.

The pipe is equipped with a pressure fitting on the built-in installation box or a split pipe.

The materials used, along with the new corrugated shape, guarantee high flexibility and mechanical resistance, making the pipe ideal for duct applications.

Ideal for duct and buried installations.
