

Condensate drain pipe Ø 20 double cladding - Sleeves Ø 18/20

- cod. 11126345 - cod. SCD300002

DESCRIPTION

The corrugated condensate discharge pipe Ø20 is made in anti-UVA polyethylene with white double coating on the outside and black on the inside.

Packaged in 50 m rolls or 25 m mini-rolls.

Every 52 cm there are Ø18/20 m/f fitting sleeves; this helps to cut the pipe to length to avoid wasting material.

The pipe is equipped with a pressure fitting on the built-in installation box, a split pipe or "REGIO" siphon.

The materials used, along with the new corrugated shape, guarantee high flexibility and mechanical resistance, making the pipe ideal for duct applications.

Ideal for duct and buried installations.
