

Condensate discharge pipe Ø 20 with double coating - Sleeves Ø 16/18 and Ø 18/20, alternated

- cod. SCD300086

DESCRIPTION

The corrugated condensate discharge pipe Ø20 is made in polyethylene with double anti-UVA coating and is packaged in 50 m rolls.

Every 52 cm there are alternated Ø16/18 and Ø18/20 fitting sleeves; this helps to cut the pipe to length, choosing the correct and required joint.

The materials used, along with the new corrugated shape, guarantee high flexibility and mechanical resistance, making the pipe ideal for buried and duct applications.
