DESCRIPTION

Linear retracting diffuser in anti-condensate PVC with insulated damper and plenum.

Available with 20 or 30 mm slot in black or white.

With a unique, original design, the plenum is made of galvanised metal sheet coated with closed-cell polyethylene.

This retracting linear diffuser combines design and function, blending perfectly into any room, with uniform air diffusion and high thermal induction.

This innovative diffuser is made from PVC which, in contrast to aluminium, due to its physical characteristics does not produce condensate; this avoids the formation of fungi, mould and bacteria inside the diffuser and ensures excellent wall insulation.

The inlet collars are included in the pack and must be assembled according to installation needs.

The plenum has other built-in installation boxes for additional ducts and VMC ducts, break as needed.

The damper is used to control the required amount of air and can be calibrated using a screwdriver.

ACCESSORIES

- False ceiling brackets, included.
- Continuity kit, can be purchased separately.

INFORMATION

Measures are indicated in millimetres (mm), unless otherwise specified.

The plasterboard thickness calculated for these configurations is 12.5 mm (not included in the supply).

TECHNICAL DATA

DIFFUSER	TECHNICAL SPECIFICATIONS
Material:	Anti-condensate PVC
