universal remote control for indoor units

- cod. SCD600023

DESCRIPTION

Remote control is equipped with a patented system for searching for the use code related to the operation of the air conditioner.

The numerical codes (0-9) requested are directly, visually, practically, quickly and efficiently entered.

The product is equipped with a clock, timer on/off key, room temperature display, celsius/fahrenheit conversion system, code memory and an exclusive "intelligent cooling/heating" function.
